

To whom it may concern;

I've been an XM Radio subscriber for 2 years now and find its service to be both entertaining and informative. The new XM Instant Traffic & Weather channels have been a real time saver.

Before these channels existed, I had to rely on my local, COMMERCIAL FILLED, station to keep me informed of traffic and weather conditions. By the time this information was provided, I was already in a traffic jam.

As I'm sure you know, time IS of the utmost when you're heading off to work or planning a long drive.

I respectfully urge the FCC to reject the NAB's petition 04-160. I pay for these services and wish to exercise my freedom of choice.
